

LAKSHMI NARAYANAN G S

GenAI Developer · Agentic AI & LLM Engineering · Full Stack Python

+91 8608646040 | lakshminarayanangs215@gmail.com | Madurai, Tamil Nadu, India | Open to Relocation (Bangalore) / Remote

PROFESSIONAL SUMMARY

GenAI Developer with 3+ years designing and deploying production-grade Generative AI, Agentic AI, and LLM-powered systems across healthcare, AgriTech, and enterprise analytics domains. Hands-on expertise across the full NLP/AI lifecycle: prompt engineering, agent engineering, RAG pipeline design, model fine-tuning, and scalable cloud deployment. Proven track record integrating AI solutions into existing systems with cross-functional teams, conducting applied research on emerging LLM/NLP techniques, and mentoring junior engineers. Seeking to design and scale advanced Generative AI solutions within Infosys' Topaz AI ecosystem.

CORE COMPETENCIES

Generative AI: LLM Fine-Tuning · Prompt Engineering · Agentic AI · Agent Engineering · RAG (Retrieval-Augmented Generation) · Hallucination Mitigation

NLP & LLMs: LangChain · LLaMA · Ollama · OpenAI API · Context-Aware Chunking · Hybrid Retrieval

Machine Learning / Deep Learning: TensorFlow · Keras · PyTorch · Scikit-learn · CNN · Supervised Learning

Cloud Computing & MLOps: AWS (EC2, S3, Lambda) · GCP Basics · Docker · FastAPI · MLflow · CI/CD

Python Programming & Backend: Python · Django · DRF · Flask · Redis · Django Channels · WebSockets

Data Analysis & Visualization: Pandas · MySQL · Matplotlib · Plotly · Trend Forecasting · Data Analytics

Frontend & AI-Assisted Tooling: React.js · Claude AI · Cursor AI · ChatGPT · GitHub Copilot · DeepSeek

Certifications (In Progress): AWS Cloud Practitioner · TensorFlow Developer · DeepLearning.AI Specialization

PROFESSIONAL EXPERIENCE

AI Product Engineer — Full Stack Python Developer · Osiz Technologies, Madurai *Jul 2023 – Present*

POC-AI · Generative AI / Agentic Document Intelligence (RAG System)

- Designed and implemented an advanced **Generative AI** pipeline (LLaMA + LangChain + Ollama) enabling natural-language, agent-style queries over enterprise PDFs, cutting manual review time by 60%.
- Applied **prompt engineering** and context-aware chunking with hybrid retrieval strategies to reduce LLM hallucination, achieving 90% + user satisfaction in pilot deployments.
- Conducted ongoing research into emerging **NLP** and **LLM** techniques to continuously improve retrieval accuracy and response quality.
- Integrated Matplotlib/Plotly dashboards for **data analysis** and visualization, enabling clients to surface insights from unstructured documents at scale.

AI in Healthcare · Predictive Risk Analytics Platform

- Architected an end-to-end **machine learning** and **deep learning** patient risk-prediction pipeline (TensorFlow + DRF), achieving 88%+ diagnostic accuracy across 3+ hospital clients.
- Reduced clinical decision latency by ~40% via real-time model inference; owned the full lifecycle from data ingestion through production API delivery.
- Containerized the inference service with Docker + FastAPI for scalable, **cloud-ready** deployment, cutting environment setup time from days to under 2 hours.

AI-Influencers · Real-Time Social Media Analytics Engine (Agentic Workflows)

- Built a real-time trend-forecasting engine (Django Channels + Redis + React.js) using automated, **agent-style** pipelines to process multi-platform social data, boosting client content engagement by up to 35%.
- Collaborated with cross-functional product and design teams to integrate AI-driven insights into existing systems for 5+ enterprise clients, reducing time-to-insight from days to minutes.
- Mentored junior team members on AI-assisted development workflows (Claude AI, Cursor AI, GitHub Copilot, DeepSeek), fostering a culture of continuous learning.

AI in Agriculture · Precision Smart Farming Platform

- Delivered CNN-based **deep learning** plant disease detection (92%+ accuracy) deployed to active farming communities, integrated with IoT sensor data for real-time crop monitoring.
- Engineered crop-yield prediction models projecting ~25% improvement in resource allocation efficiency; designed an irrigation module targeting 20% water savings.

EDUCATION & CERTIFICATIONS

MBA · Sourastra College, Madurai *2023 – 2025*

B.Tech, Information Technology · KLN College of Engineering *2018 – 2022*

Certifications (In Progress): AWS Cloud Practitioner · TensorFlow Developer Certificate · DeepLearning.AI Specialization

RECOGNITION & LANGUAGES

Awards: Star Performer Award · Prime Participant Award

Languages: Tamil (Native) · English (Professional) · Hindi (Conversational)
